1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3-6, 9, 16, and 18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 0721974 Araki et al..

See the abstract; page The small amount required of fluorinated surfactant falls within the scope of “essentially free”.

3. Claims 1-21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 09/857081. Although the conflicting claims are not identical, they are not patentably distinct from each other because, although the claims differ somewhat in scope, they overlap to the extent that it would have been obvious to one of ordinary skill in the art at the time of the instant invention to use the copending claim limitations in the instantly claimed method.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 4369266 Kuhls et al..

Kuhls et al. discloses the instantly claimed invention at the abstract; column 2, lines 32-51; column 6, lines 25-34; column 7, lines 13-64; column 10, lines 41-68; and the remainder of the

document. The limitations of the anion exchange resin of the instant claims 10 and 14-15 would be inherent for the exchange resin to exchange the anions of the patentee as effectively as the patentee requires.
